

## **MedLink International Enters into Distribution Agreement with Medicalis**

September 5, 2008- Islandia, NY--MedLink International, Inc. (OTCBB:MLKNA.OB), a leading provider of Healthcare IT services to the medical community announced today that it has entered into a Distribution Agreement with Medicalis Corporation, the industry leader providing next generation, clinical decision support (CDS-DI) solutions and integration technologies focused on improving the quality and efficiency of diagnostic imaging in health care. MedLink will now offer the complete range of Medicalis solutions to provide its radiology customers with clinical decision support for diagnostic imaging, as well as facilitated management of radiology pre-authorization programs from referring physicians.

“With Medicalis CDS-DI integrated into the MedLink EHR Total Office and MedLink EHR Lite at the point of care, referring physicians can take care of the requirements related to any patients medical imaging procedure all within the confines of the MedLink EHR –including ordering and scheduling of the exam, as well as any pre-authorizations processes. Radiology groups can significantly reduce the financial burden and create efficiencies for the referring physician and their staff that spend as much as ½ an hour to secure one pre-authorization for a patient. Not only does the solution increase efficiencies for radiology centers workflow through integrated scheduling and electronic ordering but creates a significant competitive advantage over competing radiology groups by significantly reducing the burden on the referring physician.” Stated Ray Vuono, Chief Executive Officer of MedLink International, Inc., and continued “This offering leverages our current relationships in the imaging marketplace and gives MedLink an additional revenue source from the more than 500 medlink EHR Lite installations, in addition to the lab integration and e-prescription channels.”

“Medlink’s decision to embed diagnostic imaging Clinical Decision Support (CDS-DI) and advanced workflow tools directly into their Medlink Office & Lite EHR solutions places them on the leading edge of EMR companies delivering significant clinical and administrative benefits to physicians in their offices”, says Ron Kelly, CEO of Medicalis. Medicalis’ advanced imaging solutions are designed to plug into EMRs and CPOEs to seamlessly deliver advanced quality and productivity services into in the context of a physician ordering a test. The physician’s experience is similar to prescription-drug databases currently embedded into the ordering workflow of EMRs. Physicians using Medlink’s Office & Lite EHR will be able to place diagnostic imaging orders in the same

way that they always have, and only when there are alternative tests to consider, they will be seamlessly presented with these options with their EHR. This process delivers the evidence-based practices from leading diagnostic imaging and imaging sources and advanced ordering and scheduling services while the physician is considering tests for their patient. The seamless experience eliminates the interruption required to reference text books or online websites.

### **About Medicalis Corporation**

Medicalis is a leading provider of healthcare information technology and Clinical Decision Support for diagnostic imaging. Medicalis delivers web-based clinical and integration services to physicians, providers and health plans to provide advanced diagnostic imaging solutions that improve quality and efficiency of diagnostic services.
